

# DORMAN PRE-PRESSED AXLES

## TIME-SAVING FRUSTRATION-FREE REPLACEMENTS.

Replacing rear wheel bearings on some Toyota trucks can be frustrating. The bearing housing often becomes damaged when the old bearing is pressed out, or when the new bearing is pressed in. Dorman's OE FIX pre-pressed axles eliminate the uncertainty of performing this basic repair with all of the major components already assembled and ready to install right out of the box.

## NO SHOP PRESS NEEDED

**No pressing or cutting required** – can be easily replaced without needing special equipment

**Technician preferred** – bolt-on solution can save 90+ minutes when replacing difficult press-in wheel bearings

**Ready to install** – assemblies include axle, bearing, backing plate, bolts and seals

**Quality assured** – backed by limited lifetime warranty
