The Power of WAI

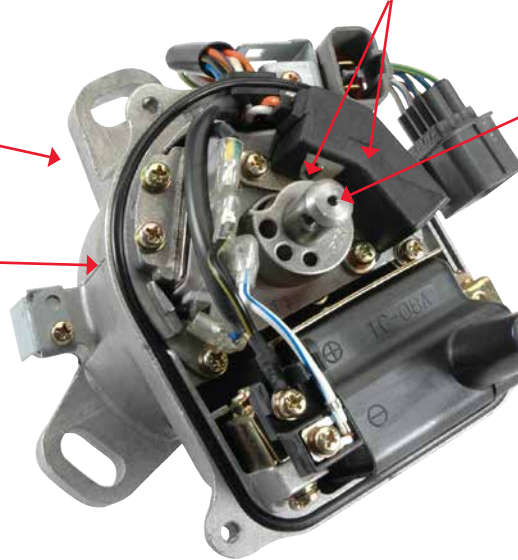

Precision Engineered ignition modules and plugs ensure proper performance plus precise connection (where applicable)

Precision Machined bodies assure correct fit and accurate mount locations

Precision Machined and ground shafts assure high speed accuracy and prevent bearing failures

100% New Components and fasteners eliminate premature failures

OE Equivalent high voltage ignition coils

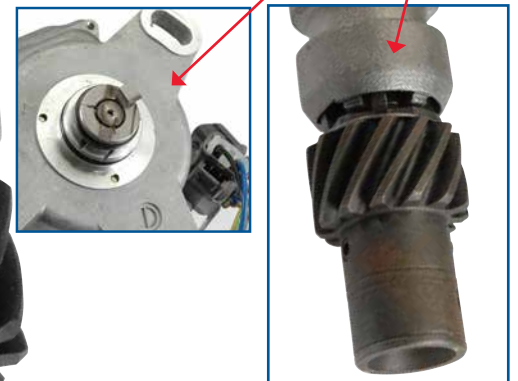

Competitor's Unit

WAI Brand Complete "ready to install" including cap, rotor, coils, modules + wire harness (where required)

Competitor's Gears

May be inferior to OE in hardness and cause excessive wear or engine damage

WAI Brand Assures customer satisfaction with OE equivalent gears with correct hardness (HRC 18-26)
